

## PULSALink Graphs Update Version 2: **On Demand**

---

### **IMPORTANT:**

**ALL** your automated graph reports will dispatch in **America Eastern Time!** Please **UPDATE ALL** your reports if you desire a different timezone!

### **MOBILE USERS:**

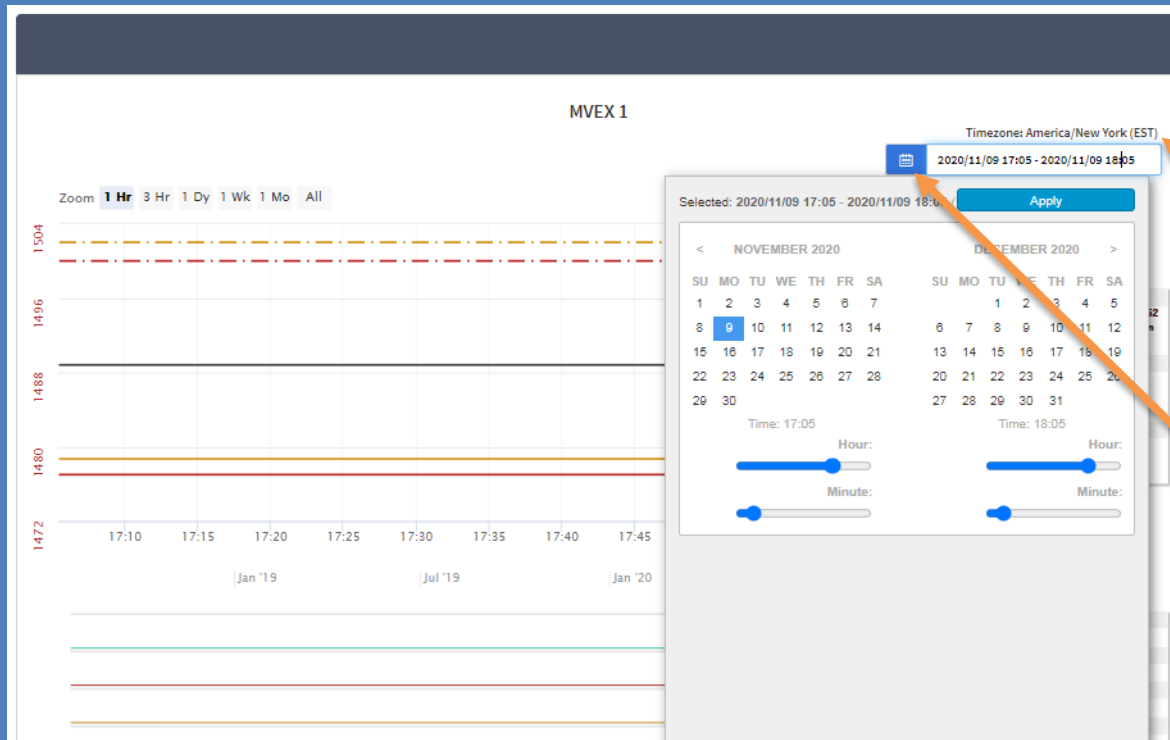

App Store and Play Store Pulsalink **App graphs will no longer receive updates.** You may **still modify settings** and look at **live reading status** through the apps. *We are updating the mobile apps soon!*

---

### **Release Note:**

- PULSALink MicroVision EX Graphs are now **ON DEMAND**
  - PULSALink graphs will load recent data **much faster**
  - You may now see **all the data** our servers have for your online devices
  - Automated graph reports are **more reliable**
  - Devices will incorporate our server time and adapt to your timezone instead of device time (**more accurate**)
  - **Compatibility** with Internet Explorer 11

- User interface changes
  - Each **graph line** in the probe chart now has its **own axis**
  - Added a **timezone label** that matches your timezone
  - Moved **calendar options** for specific data range to a button under the timezone label
  - Added **Hour** to graph range for **automated graphs**
  - Added **timezone dropdown** option for each **automated graph** report
  - Start **date and time** for report **dispatch** will be in your **selected timezone** option
  - Added water **meter totals** into the **water meter legend**
  - **Tooltips** on the probe chart series will show you your **device time** as well
  - **Removed water meter totals bar graphs** in favor of the water meter total in the legend
  - **Removed** ability to **specify** the **axis range** (graph auto-adapts to data range)
  - **Removed color change** option (**will return** in a future update)
  - **Removed page pdf download** option (**will return** in a future update)

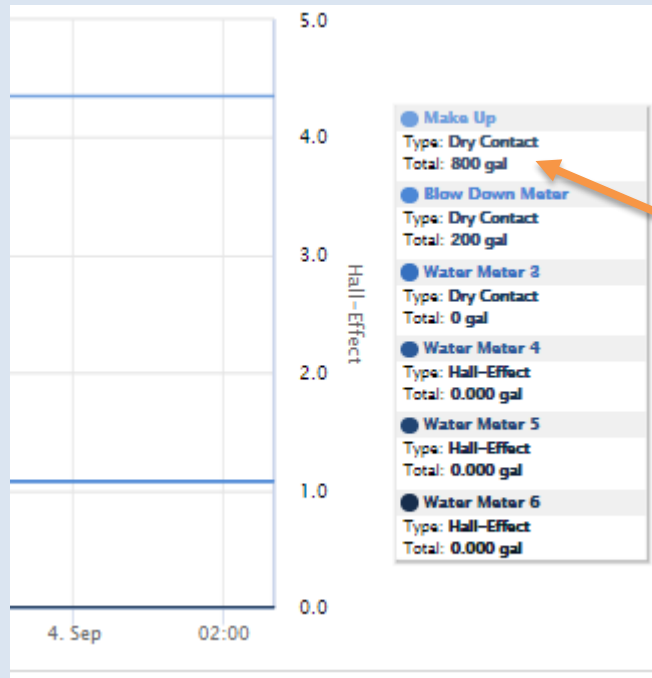

#### Timezone Label

- Timezone will be decided based on your computer settings.

#### Custom Range

- Click the calendar icon if you want specific range.

Water meter totals are inside the legend.

Water Meter 4  
 Water Meter 5  
 Water Meter 6

**Graph Range**  
 Hour  
 Day  
 Week  
 Month  
 Custom

Custom Range:  Hours Prior

**File Type**  
 PDF  
 PNG

**Timezone (NEW)**  
(Initially: auto-detected)

You can now have automated reports in hours.

Timezone can now be selected for each automated report.

The timezone list is massive, so you can reset the option by selecting the "Select my timezone" button.

**Email Settings**

**Recipients**  
 +  
john@doe

Daily  Weekly  Monthly

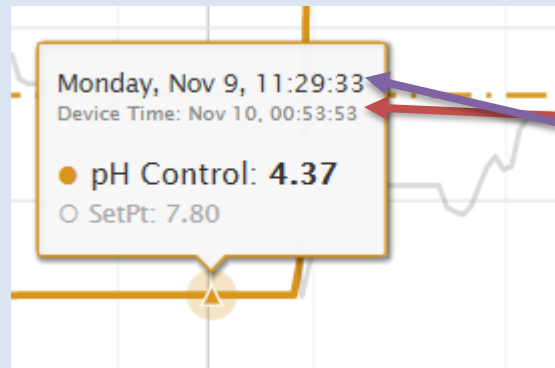

**Start Date and Time**  
   
06 : 30 AM  
Asia/Shanghai

The selected timezone for your automated report will be taken into consideration when you select the start date and time you want the report to be emailed.

Example:  
11/09 6:30AM **Asia/Shanghai** is equal to  
11/08 5:30PM **America/New York**.

Previous Report	Upcoming Report	Options
Nov 10 2020 08:24 PST	Nov 12 2020 08:24 PST	<a href="#">Edit</a> <a href="#">Delete</a>
	Nov 18 2020 16:00 EST	<a href="#">Edit</a> <a href="#">Delete</a>

Selected timezone options for each report will be seen in your report table.

Tooltips on the probe charts will also display the **device time**. We no longer use your device time as the time factor because our **server time** is much more accurate; but it is still a value that may be useful for troubleshooting.
