Dear Valued Customer,

On Friday, 9/1/17, PULSAlink was successfully updated to include a convenient and responsive graphing suite. To access this new feature, click on the desired controller in PULSAlink and click the reports tab in the top toolbar. Currently, most controllers will only have data since 9/1/17 and for the graph to render fully, 4 days of historical data is required. Tomorrow morning you should see a nice responsive graph for your respective controllers connected to PULSAlink. In the next few weeks we will work to build the historical data of controllers which have been online.

We appreciate your patience and hope you enjoy the upgrade.
